

# R7000

## Intelligent Security Management

### All Your Automation in One

The R7000 platform advances security automation and simplifies incident response for physical security operations of every size.

Operators can take complete command of any threat situation emerging from across their physical security and building technologies – all through a single pane of glass.

This improves the speed and quality of incident response, while reducing false alarms and operational expenses for enterprise-wide command, control and display (CCD) applications.

### Unlike Other Security Management Solutions:

-  **Continuous Evaluation:** All data processed in real-time
-  **Risk Visualization:** All data presented in dynamic user interface
-  **Threat Hunting:** All data evaluated against security policy for early warnings of complex threats
-  **Automate Routines:** Eliminate routine manual processes for improved responses
-  **Orchestrate Responses:** Connect and integrate disparate tools for improved responses
-  **Adaptive Playbooks:** Adjust security procedures based on real-time activity
-  **Contextual Credentials:** Adjust internal facility access privilege based on real-time activity

### Standard Features

All R1000, R3000, and R5000 features are standard with R7000 tier.

- Risk-Adaptive Awareness Server License
- Risk-Adaptive Command & Control Server License
- Mobile Guard Clients
- Employee Onboarding & Off-Boarding Clients
- GPS Maps Workstation Clients
- Centralized Monitoring Thin Clients
- Situational Awareness Workstation Clients
- Risk Awareness Workstation Clients
- Risk-Adaptive Command & Control Workstation Clients
- Access Control Hardware Connector

### System Options

All R1000, R3000, and R5000 system options are available with R7000 tier.

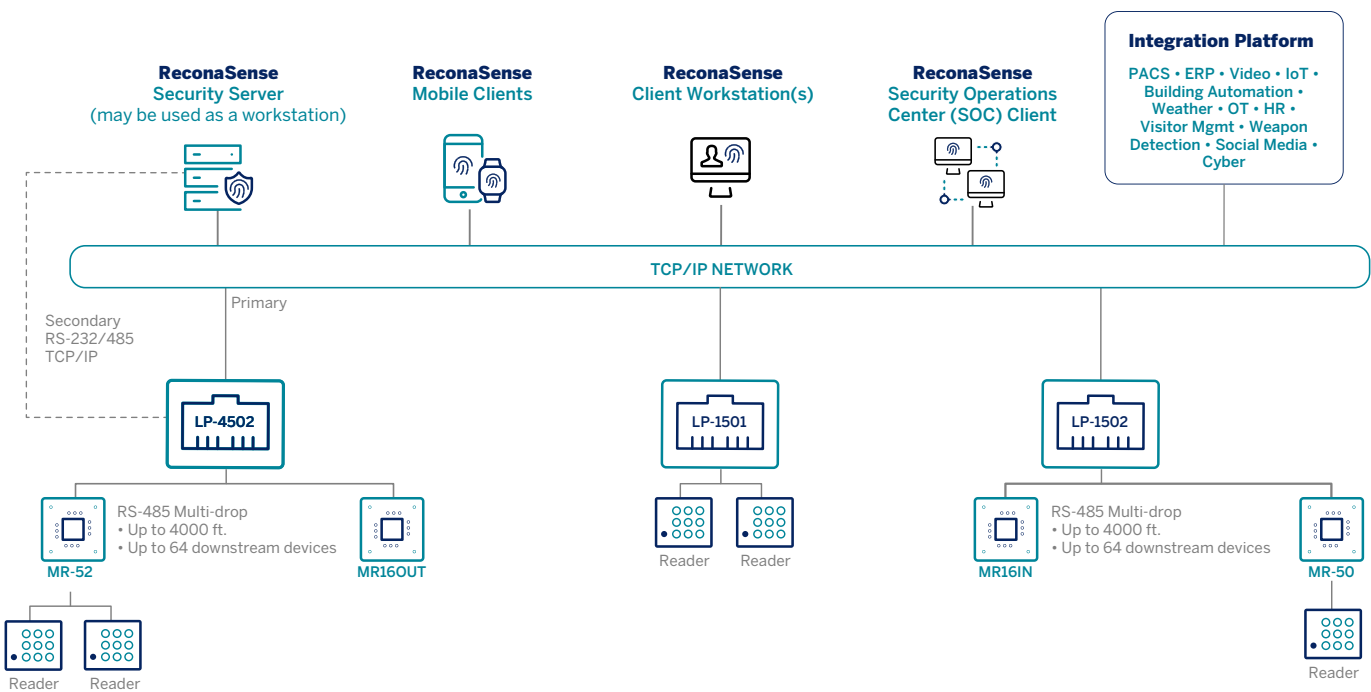

- Weapon Detection Connector
- Emergency Weather Connector
- Visitor Management Connector
- Asset Tracking Connector
- Tailgate Detection Connector
- Population Counting Connector
- Platformatics LED Lighting Connector
- Active Directory Connector
- Access Control Software Connector

CENTRAL SERVER REQUIREMENTS	
Operating System	Windows 10, 2012, 2012 R2
CPU	i5 or i7 with 2GHz or faster with + 4 Cores
Hard Disk Space	12 GB
Database Space	1 TB
Database Versions	SQL 2010 – SQL 2014

SYSTEM CAPACITIES	
Access Control Reader Licenses	Unlimited
Access Control Reader License	Unlimited
Access Control Credential	Unlimited
Credential Formats	Unlimited
Cameras Viewable	Unlimited
Concurrent Workstation Clients	8 per site

## Simplified Security Management with Advanced Automation

Seamlessly integrate, control and analyze all security inputs from virtually any source with ReconaSense. You can monitor and control access using a customizable and intuitive interface that’s available from a mobile device, workstation or your SOC. ReconaSense works together with Mercury intelligent controllers to provide security and managed access for as many doors and entry points as needed.

## MAKING SECURITY INTELLIGENT

ReconaSense helps protect people, assets, buildings, and cities with its integrated automation and unified physical security intelligence platform. ReconaSense identifies and mitigates potential threats and attacks before they happen by providing security teams the ability to go beyond managing data and individual alerts to achieving authentic situational awareness and rapid response capabilities.
