

# NEXT-GENERATION DATA CENTERS: THE RECONA SENSE® ADVANTAGE

In today's digital age, Data Centers play a critical role in managing the massive amounts of data generated by businesses and organizations. With the increasing complexity of data security threats, data center operators need to ensure that their facilities are designed to meet the highest standards of security and reliability.

ReconaSense, a leader in **next-generation access control** security solutions, is proud to introduce Data Centers to the R7000 - the ultimate protection against unauthorized physical access.

Our newest **risk-based physical access control** release provides *customizable access levels, early warnings, and automated responses* to physical security practitioners – all through no-code workflows.

The R7000 augments your access control to continuously monitor activity levels of the surrounding environment and programmatically adjust access levels, response procedures, and operator privileges - all in real-time.

From your main entrance to your server racks, ReconaSense helps eliminate unauthorized physical access throughout your data center by improving detection and response capabilities surrounding unauthorized access, theft, sabotage, insider threats, and more.

## KEY APPLICATIONS

- Insider Threat Detection across Facility
- Automated On/Off-boarding Management
- Occupancy-based Access to Containment Areas
- Segregation of Duties across Operators
- Natural Disaster Emergency Shelter

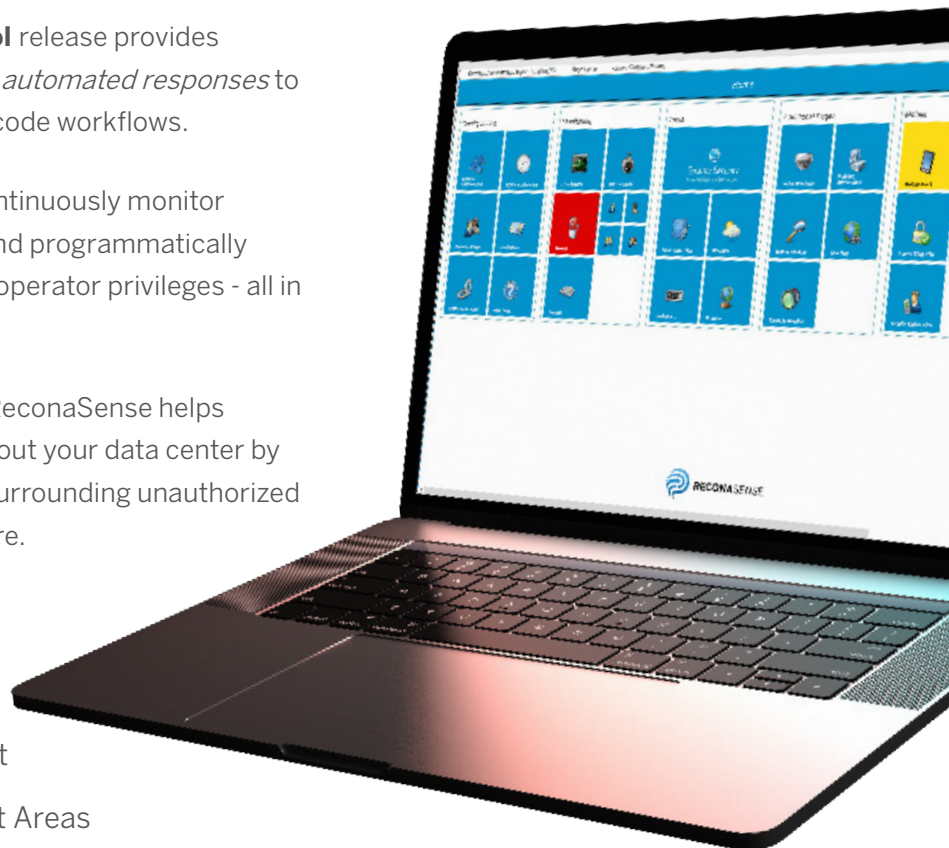

### KEY COMPLIANCES

- PCI-DSS
- HIPAA
- ISO 27001

### KEY CAPABILITIES

- Customizable Access Levels
- Automated Responses
- Early Warnings

## About ReconaSense

ReconaSense® is the first COTS risk-adaptive framework with FICAM certification that can uniquely help identify Insider Threats via real-time data transformation, evaluation and automated policy adjustments. We protect federal, military, state, and other critical infrastructures requiring top-grade security with insider threat detection and our unification platform.

ReconaSense is privately held company headquartered in Austin, Texas.
